Full Stack .NET Developer

EDUCATION

Bachelor's Degree in Software Engineering – University Center Cidade Verde - Brazil (2022 – 2026).

Back-end C# – Ada Tech

Fullstack Development – Gama Academy

SUMMARY OF QUALIFICATIONS

I am 24 years old and passionate about solving technology problems. I started programming at the age of 17 and have been continuously improving since then. I have experience with various languages and frameworks, such as .NET, Python, Angular, React, React Native, Flutter, Xamarin, and Node, among others. I am also proficient in databases like Oracle, SQL Server, and MySQL, as well as agile methodologies like Scrum and Kanban. Additionally, I have experience with Oracle Cloud and Microsoft Azure, where I develop scalable and flexible applications.

Currently, I work as a Fullstack Developer on challenging and innovative projects. I always strive to deliver quality solutions with a focus on customer satisfaction and continuous improvement. I enjoy sharing my knowledge and learning from others.

PROFESSIONAL ACTIVITIES

MTM – 02/2024 – Present

Full Stack Developer

As a Developer and Systems Maintainer at Eurofarma, I am passionate about clean and efficient code. I specialize in integrating with cloud platforms, including Oracle Cloud and Azure. My commitment lies in adhering to best programming practices and delivering exceptional results inside the company.

SINQIA – 02/2023 – 02/2024

Full Stack Developer

Responsible for implementing two-factor authentication in the pension portals of Usiminas and the ATH system used by Energisa and Banesprev, aiming to comply with the General Data Protection Law and improve access security to the portals for thousands of participants. All development was with C#, Visual Basic, Angular, Ionic, Xamarin, Oracle, and SQLServer.

ZTAURUS – 11/2022 – 06/2023

Mobile Developer

Responsible for creating a mobile application to serve agricultural aviation companies. The main functionality of the application is the creation of safety and operational reports that can be made offline by pilots in the field where there is no internet access, and as soon as the employee has a network, the reports can be synchronized to the API. The

application was made in React Native.

INTELLIGENCE KAPITAL – 03/2022 – 11/2022

Junior Developer

Updating, creating new features, and internationalizing the main product of Intelligence Kapital for Denmark and Portugal using micro-services in .NET Core (Entity Framework) and front-end in React. Carrying out maintenance, prioritizing calls, improving processes and documentation, and integrating with other teams.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

ENHANCEMENT ACTIVITIES

Microservices Architecture with .NET – Udemy (Leandro Costa)
Complete C# Object-Oriented Programming – Udemy (Nelio Alves)
React Native Course – Codecademy
Angular Developer Enterprise Training – DIO
Complete Docker from Zero to Advanced – Udemy (Andre Iacono)
React Native Training – Alura
ASP.NET Core REST APIs Training – Alura
C# and Object Orientation Training – Alura
Node.js: Unit and Integration Tests – Alura
React: Writing with Typescript – Alura
Front-End Engineer Career Path – Codecademy
Advanced React Course – Codecademy
C# Course – Codecademy
Java Course – Codecademy
Java e java.util: Collections, Wrappers and Lambda expressions – Alura
Gama Experience #43 – Gama Academy
Java OO: Understanding Object Orientation - Alura
C Course – Codecademy
Intro to Cloud Computing Course – Codecademy
Introduction to Cybersecurity Course – Codecademy
Certificate of Authority: PHP - DevMedia
Knowledge in Digital Marketing, Media and Growth
Advanced English – Wizard
Intermediate French– Wizard
Basic Mandarin – Confucius Institute UNESP
Basic German – Stephanie Lich Institute
